## Teach Your Kid At Home

## Explanation

## Counting is Important You can count by different numbers

You don't have to just count by 1 . You can count by 2 , 5,10 or whatever you want.

What if you have two horses inside of a gate and another two horses inside of another gate....and two more.

You could count 2, 4, 6...and get to the total number of horses, right away! Try doing the problems on these next few pages. Count by 1, 2, 5, 10 and 20!
